River Fox

Built in 1911 by the Northern Electric Railway Company, the River Fox Train's 10-mile track originally transported passengers in the Sacramento area. Electric passenger travel ended in 1941, but the line remained active with diesel freight, creating a link between the fertile farmlands of the Sacramento Valley and the rest of California. In 2003, Sierra Railroad merged with the Yolo Shortline, continuing freight and reviving passenger trains under the name of Sacramento River Train. Today, the line is known as the River Fox Train, a sister of the world-famous Skunk Train built in 1885. From events like our Railbike rides; relaxing beer and wine trains; and holiday-themed outings, passengers can enjoy activities while reveling in nostalgic railroad charm.
